Chimney Rock Farm Network

When you join the Chimney Rock Farms Network of Farmers and Growers you contribute directly to the Research and Development we do to make you more successful.

We develop advanced genetics for Nutraceu-tical Manufactures that farmers can grow in their region.

Chimney Rock offers:

- Consulting.
- Education
- Genetics.

The Research Center is located at 6,500 ft in a remote western Colorado valley. We experience the same extreme weather found throughout the United States: from cold winters to wet windy springs to long hot summers and fall. We develop strains for all climates and focus on pest resistance, plant yield and awesome full spectrums cannabinoid yields.
